AutoCAD 2022 Crack (left) and Inventor (right) are both commercial CAD programs available from Autodesk. AutoCAD is the most widely used commercial CAD software package in the world. In 1982, as the company was being formed by Dennis Flatt, Ken Stahnke, and Ned Wynn, Autodesk was formed. Initially, CADLAB was licensed to Sperry Research, which was being created to sell the new CADLAB. Autodesk also licensed CADLAB to Honeywell. The 3-D version of AutoCAD, AutoCAD 3D, was introduced in 1986. Autodesk offered an Autocad LT for the Mac in 1987, and introduced AutoCAD for the Mac in 1989. In 1992, Autodesk introduced the first product based on the.NET technology, AutoCAD Map 3D, that allowed users to publish and share AutoCAD drawings to the Web. At this time, AutoCAD, as well as other software based on.NET, used the term "Product" to refer to the application, rather than the industry term "software product". Auto
